

Moonlight Jugglers

PRESENTATION

From immemorial times the Moon - and its likely inhabitants - have been axis of the most varied human fantasies. In this show, the moon jugglers recreate in their imagination to tell us a visual story that revives the curiosity and the ability to surprise us.

SINOPSIS

The "Lunar Sphere" starts the itinerant show in an amazing atmosphere. The moon jugglers defy the gravity with choreographed acrobatic numbers and balances.

These elegant characters, and at the same time absurd, transit the parade interacting and generating direct theatrical actions with the public.

Juglo (sound moon carriage) presents his crew the technology of elements with LEEDS (clubs, swings, ranges, strings of lights). The Moon' jugglers delight us with a show of handling such light objects. At the end of the show, they undertake the trip, leaving in the scene contrails of their particular universe.
